

# Centre for Indian Languages and Culture Studies Diamond Harbour Women's University

## One Year Diploma Course Communicative English & Communicative Hindi 2022-2023

### About the course

*One can master the rules of sentence formation in a language and still not be very successful at being able to use the language for meaningful communication." (Richards 2006)*

The main purpose behind communicative language teaching is to prepare students to be confident communicators in different real-life context. Nowadays communication plays a vital role in every walk of an individual's life. Wherever life exists, communication also exists. Communicative language has become an important tool in the fast changing professional world. While considering all these aspects, the success of any profession depends upon proper communication. Through this course the participants will be able to equip themselves with knowledge of communicative skills in different languages and be able to face the challenges of the world.

## Centre for Folklore Studies Diamond Harbour Women's University

### One Year Junior Diploma Course of Folk Music

2022-2023

#### About the course

*Music has always been an important aspect in the lives of Indian people. India's rich cultural diversity has greatly contributed to various forms of folk music. Almost every region in India has its own folk music, which reflects local cultures and way of life. Folk music in India is crucial to understand since it depicts the culture of a specific region. It informs us about century-old human practices, traditions, and religious views and also helps us learn about our evolution. From this course participants will gain thorough knowledge of Bhatiyali and Jhumur the two important folk music of Bengal along with an in depth understanding of contributions of great Indian musicians.*

## Centre for Ecology and Biodiversity

### One Year Post Graduate Diploma in Ecology, Biodiversity and Natural Resource Management (PGDEBNRM)

#### Course at a glance

Biodiversity includes all the living beings and natural resources around an organism. It forms an essential part of the ecosystem by supporting all the natural processes of life. Biological assets of this mother earth are currently facing an unprecedented crisis due to several anthropogenic activities. The sustainable use and proper conservation practices of biodiversity and natural resources may promise the future wellbeing of the mankind. This course is designed in such a way which will help the participants to develop an idea about the present status and threats to the local biodiversity and take the necessary measures to conserve the same. The course also includes management of natural resources which can help to develop skills among the participants through which they can mobilize the resources in a scientific way. The participants will also be able to implement their knowledge in the applied fields like scientific aquaculture practices, apiculture, oyster farming, vermicomposting etc.

#### OBJECTIVES

- ❖ To cultivate the knowledge about the flora and fauna in a particular region.
- ❖ To create awareness about the role of an individual in an ecosystem and their uses in applied sector.
- ❖ To know about natural resource utilization pattern and management by the communities and promote the idea of sustainable use of natural resources.

#### Expected outcome:

- ❖ Scientific and rational use of biodiversity may strengthen the economy of the country.
- ❖ Different hands on training program may create self-employment and job opportunities in fisheries and forest sector.
